### THE LOCAL STOCK MARKET.

A GOOD SHOWING FOR BUT FIVE DAYS' BUSINESS.

Metropolitan Railroad the Leading Feature-Washington Gas Stock Stronger-Improvement in Chesapeake and Potomac Telephone Stock-National Union Insurance Stock Stronger.

There was a decided improvement in the tone of the local stock market last week, and the volume of business for the five business days showed a gratifying increase. The feature of the week was the depression in Metropolitan Railroad stock, which on Tuesday sold to the extent of 10 shares at 97. This is the lowest price at which this stock has sold for over three years, and shows a drop from the prices of a year ago of nearly \$80 per share, and from the quoted prices of a week ago of about 10 per cent. The immediate cause of the drop was thought to be the proposal of the drop was thought to be the proposal of the company, by a circular issued last Monday, to allot to the stockholders, prorata, according to the number of shares owned by each, of \$100,000 convertible bonds, bearing 6 per cent. interest, which bonds at the expiration of one year from their date, at the option of the holder, were to be exchangeable into the stock of the company at \$100 per share. The circular was doubtless \$100 per share. The circular was doubtless understood to imply that as the company proposed to furnish its stock at \$100 there was little probability that it would for some time command a better price. At the close of the week there was a better feeling manifest, and the bid was advanced to 100, with the lowest offering at 110. It is said that orders are on the market for several hundred shares at 100. The Metropolitan Company is making extensive preparations for introducing electric storage battery cars, and owing to a favorable arrangement made with the inventor of the system to be used the expense will be much less than is generally supposed. Exten-sive power-houses are in course of erection at the P-street stables.

There were no public sales of Graphophone stock. Privately 50 shares changed hands several times, first by a reluctant seller, obliged to have the money, at 6; later at 6½ to a broker, who said his order was to buy at 6½. The lowest offered of this stock was at 7. There is nothing new in the Graphophone situation. The laws of New York allow one month for an assignee to file his schedules before proceedings can be taken toward winding up a business. As this period since Mr. Lippencott's assignment will not expire before the 4th of June it has not been possible for the directors of the Graphophone Company to take any active measures toward obtaining a settlement in the premises. In the meanwhile the improvements in the machine are pro-

gressing very satisfactorily.

There are already indications of the improvement predicted in this article as likely to take place in Washington Gas stock. For 43 shares 44½ was paid and 2 shares bought 44½. At the close 44½ was paid to be lowest price at which this stock was offered. this stock was offered.

There was a good market for National Union Insurance stock last week. It opened with sales at 182, sold up to 184, and closed with a sale of 25 shares at 19, a rise of nearly \$1 per share, which is over 5 per cent.

The market continues good for American Security and Trust stock. The aggregate sales were 120 shares, mostly at 80% and 80%. The closing bid was 80, the lowest offering 82.

There is an improving tone manifest in Chesapeake and Potomac Telephone stock. Ten shares brought 62, and 30 621. There are indications that this stock will speedily bring much better prices. The lowest offering at the close was at 63. This offer will probably be withdrawn and a better price demanded. The only sale of Pennsylvania Telephone stock recorded for many months was made on Friday. It was of 25 shares, and brought but Friday. It was of 25 shares, and brought but \$24, and not \$25, as published. This sale was made for an out-of-town holder, not aware, doubtless, that the usual bid of 25 "for a quotation" \$1,000 worth is merely nominal, nobody expecting that a stock so valuable would be allowed to go for such an inadequate price. This company is prospering greatly, its earnings increasing steadily, and its stock will pay at 25 just 8 per cent. As compared with Chesspeake and Potomac, the Pennsylvania at 40 on its present dividend Pennsylvania at 40 on its present dividend would yield the same return as the former would at 50, which is just \$13 less than the Chesapeake can be bought for.

There is an advancing tendency in Washington Loan and Trust stock. The aggregate sales were 22 shares at from 96 to 963.

Eckington Railroad stock is looking stronger. Ten shares brought 491, 10 50, and 8 501. The last sale was at 50, the lowest of-

The business in bank stocks last week was but small. Twenty shares of West End brought 101. For 10 Lincoln Bank 101½ was paid, 10 went for 101, and 10 for 102. There is much quiet satisfaction expressed at the fact that the announcement of the purchase by the Lincoln Bank of the property at the north-west corner of Ninth and D streets is now understood to have been premature. The recent weakness of this stock is believed to have been due to this supposed purchase of real estate, for it is a well-known principle of banking that in most instances it is extremely bad policy to the up in such a permanent of such a p form a large proportion of capital which should be held within easy reach at all times. There are notable exceptions to this rule in this city, however. There were but 3 shares of Columbia Bank stock sold last week; it brought 152. The same price is offered for more, with the lowest offering at 156.

The lowest sale of Washington and Georgetown Railroad stock recorded for several years was made last week. Five shares went for 210. There was a further offering at 211, with 200 bid. Belt Line also sold off. Twenty-two shares brought 48, and 4 shares 471.

There were but 10 shares U. S. Electric Lighting stock sold last week. It was sold very low, bringing 160. The closing bid was 158, and 165 the lowest offering. This stock is so firmly held that a very limited demand would carry it much beyond current. mand would carry it much beyond current

Now that the payment of taxes for the year is over, there is likely to be more money seeking investment in stocks. It is, however, a gratifying fact, and indicates the ease in the local money market, that for many years the May payments of taxes have not been met with so great apparent comfort and conve-
